

## Dermastir Post Filler - Collagen

Inspired by dermatological collagen treatments, Alta Care Laboratoires has created Dermastir Post-Filler Collagen that is applied onto wrinkles to diffuse them out. Dermastir Collagen fills in the depth and length of facial lines and wrinkles. Dermastir Post-Filler Collagen can be applied on all types of wrinkles: forehead wrinkles, wrinkles around the eyes, smile line wrinkles, brow furrows and vertical lines around the mouth. Dermastir Post-Fillers Collagen are primarily wrinkle reducers that correct moderate to deep facial wrinkles and folds such as those around the nose and mouth (nasolabial folds).

### DIRECTIONS FOR USE:

Dermastir Post-Filler Collagen can be mixed with your cream, before application, in order to increase the concentration of collagen. Apply daily. When Dermastir Post-Filler Collagen is applied directly onto the wrinkle, use one ampoule per week. In cases when the face is severely wrinkled or in cases when the wrinkle is deeper than normal, use 2 ampoules per week.

## Dermastir Post Filler - Eye & Lip Contour

Dermastir Post-Filler Eye & Lip Contour is formulated to instantly firm the eye area and diminish fine lines, wrinkles, dark circles and smile lines. The eye contour area is made up of a very thin skin layer and it is important therefore to strengthen the eye contour with Dermastir Post-Filler. Application of this fresh, lightly pearly firming powder, perfectly suited to the eye contour area, will give your eyes a vitalized, smooth, radiant look. Similar results are observed using the same formula around the lip contour.

### DIRECTIONS FOR USE:

Dermastir Post-Filler Eye&Lip Contour can be mixed with your eye contour cream, before application, in order to increase the concentration of collagen. Apply daily. When Dermastir Post-Filler is applied directly onto the wrinkle, use one ampoule per week. If the eye or lip contour is severely wrinkled or if the wrinkle is deeper than normal, use 2 ampoules per week.

## Dermastir Post Filler - Luxury

Dermastir Post-Filler Luxury gives a porcelain look when applied to the face. Dermastir Post-Filler Luxury does not just cover up, like make up, but it also penetrates the skin to supply ingredients at high concentrations. Pores are closed in a non-occlusive way by the Dermastir Post-Filler Luxury. Dermastir Post-Filler is mainly used for a prevention in the eye contour but even in areas where the skin tends to wrinkle. The skin's natural protective system is reinforced by Dermastir Post-Filler Luxury.

### DIRECTIONS FOR USE:

Dermastir Post-Filler can be mixed with your cream, before application, in order to increase the concentration of caviar. Apply daily. When Dermastir Post-Filler Luxury is applied directly onto the wrinkle, use one ampoule per week. In cases when the face is severely wrinkled or in cases when the wrinkle is deeper than normal, use 2 ampoules per week.

# DERMASTIR®

DermaStir Vitamin C acts as a gentle exfoliator that helps erase pigmentation while smoothing the skin at the same time.

## DIRECTIONS FOR USE:

Mix the vitamin C particles with the cream and apply the mix on the parts of the face prone to pigmentation such as the upper lip and cheek bones. Excellent to mix with DermaStir Sun Protection cream that has very low levels of antioxidants. DermaStir Post-Filler Vitamin C can also be applied directly on the areas of face that are prone to pigmentation.

## DermaStir Post Filler - Scar Repair

At times a combination of DermaStir Post-Fillers may be used to layer the scar filling area. DermaStir Scar Repair Post-Filler sculpts the skin by adding volume which means that the scar is not filled just superficially but in depth. Collagen formation is supported by the penetration of DermaStir Scar Repair Post-Fillers and this helps to reduce the size and also the appearance of a scar. Positive results have been obtained on all types of acne scars, ranging from deep pits to scars that are angular or wavelike in appearance.

\* for injury wounds 1 ampoule a day until the scar forms

**Major operations**  
48 weeks treatment

**Minor operations**  
36 weeks treatment

**Skin eruptions**  
4 weeks treatment

**Minor burns**  
24 weeks treatment

**Acne scars**  
36 weeks treatment

**Old scars**  
52 weeks treatment

## DIRECTIONS FOR USE:

DermaStir Post-Filler Scar Repair can be mixed with your antibiotic cream or scar repair cream, before application, in order to increase the concentration of collagen. Apply daily. When DermaStir Post-Filler Scar Repair is applied directly onto the scars, use one ampoule per week. If the skin is severely scarred or if the scar is deeper than normal, use 2 ampoules per week.

## DermaStir Post Filler - Vitamin C

DermaStir Vitamin C is presented in a stable solid particle form at a high dosage of 25%. When vitamin C is presented in stable solid form, the activity of the vitamin C is superior to the vitamin C that is presented in liquid form. Alta Care presents this unique high dosage of vitamin C in solid form that enters the skin using nanotechnology.

ANTIOXIDANT  
25% VITAMIN C  
WHITENING

Vitamin C is presented in 40nm particles that visibly penetrate the skin and the level of penetration is deeper than other formulas.

Vitamin C is an important antioxidant that prevents pigmentation. Since it is unstable to deliver in the epidermis in the optimum dosage the research by Alta Care Laboratoires produced and developed this stable vitamin C. The ingredient in the DermaStir Post-Filler is stable and it can be dosed on the respective areas of the face that need more protection. Vitamin C is a key element in the production of collagen and vitamin C in high concentrations accelerates the skin's cell turnover mechanism, breaking up dark spots and dull skin tone as
